

Euclid Consortium

Membership Tracking

R. Clédassou

02/06/2017

EC overview: concerns

- PLM baseplate: G. Racca's presentation
- NISP: NISP radiators (ADS); NISP Detectors ; Performance of spectroscopy: stellar contamination → SPV task on sensitivity analysis: G. Racca's presentation
- VIS : Delays VIS I-CDR to be completed → FM delivery date; VIS schedule, management, performance : G. Racca and S. Pottinger presentations
- LSST: negotiations between EC and LSST: Deep and Wide observations
- Subaru and z-band (delayed by 1yr): impact on SED/photo-z → focus on Deep?
- Coordination OUs/SPV
- Preparation of SGS Design Review: C. Dabin's presentation and Garage Day Jun 09
- Preparation of the MCDR
- Integration of the SSO WG in the EC organisation
- Cosmological Simulations beyond standard model: computing resources unclear
- **Setup tracking** → FTEs, → EC Buidlers → Publication policy → Authorship

Membership & Activity Tracking

A Membership & Activity Tracking tool has been developed ...

- to treat easily the requests for membership
- to keep information during project to Who is doing What, When and at Which % of its time
- to facilitate the editorial board work given the editorial policy
- because the EC membership list (under ECL control) is the unique list from which others mailing lists & authorization access to Redmine/Wiki/GoogleDoc/... are created, & it needs to be managed properly.

- to keep information during project to Who is doing What, When and at Which % of its time
- to facilitate the editorial board work given the editorial policy
- because the EC membership list (under ECL control) is the unique list from which others mailing lists & authorization access to Redmine/Wiki/GoogleDoc/... are created, & it needs to be managed properly.

Tracking management and monitoring has been delegated to R. Clédassou (CNES) by ECL.

Rodolphe.cledassou@cnes.fr

Activity declaration is based on 6 months periods validated by “waves”.

Everybody will receive a mail to connect to the tool

Questions : mail to RC with the **exact** object : [EUCLID ACTIVITY TRACKING]
